Helping you save energy and water around the pool.

Solar pool blankets are a must-have addition to your swimming pool or spa. Once you have heated your pool, the best way to ensure the heat stays there all year round is with a solar blanket.

Pool blankets are without a doubt one of the great inventions in pool technology. Our innovative, diamond bubble-shaped solar blanket will increase heat retention, eliminate evaporation almost completely and reduce running costs in terms of maintenance and pool chemical consumption. Our solar blankets will also dramatically reduce the amount of dust and general debris that gets into your pool.

Harness the power of the sun

Water Savings

Reduce water evaporation by up to 97%, which provides water savings of approximately 50,000-70,000 litres per year depending on where you are situated in Australia.

City	Annual Evaporation per m ²	Evaporation per m ² per day	Annual Water Savings
Melbourne	1400mm	3.9mm	50,400L
Sydney	1600mm	4.5mm	57,600L
Brisbane	1700mm	4.8mm	61,200L
Adelaide	1800mm	5.1mm	64,800L
Perth	2000mm	5.6mm	72,000L

Figures are based on Bureau of Meteorology annual evaporation rates of an outdoor pool with a 40m² surface area.
Pool blanket - 90% water saving.

Energy Savings

The Diamond bubble-shape allows for closer spacing and therefore increases heat retention by up to 75% reducing CO² emissions and saving on energy normally used to run auxiliary heating systems.

Graph is based on data and figures from "pool heat" simulation program. Pool in Sydney heated to 28°C year round.
CO² Coefficient 1.381kg/kwh - electricity 0.055 kg/Mj - gas

Cost Savings

By conserving your pools water you will also reduce chemical consumption by 50-70%. By reducing your pools water and chemical evaporation losses, together with saving on energy bills, a Heatseeker Diamond solar blanket will minimise the expenses associated with maintaining your pool.

Added Benefits

- Increase your pool temperature by up to 8°C.
- Reduce the amount of dust and general debris entering your pool.

Supreme Heating's innovative range of Heatseeker Diamond bubble-shaped pool blankets will ensure your pool or spa meets modern day ecological requirements.

Diamond Bubble Range

Innovative Design Breakthrough

The Diamond bubble-shape allows for closing spacing and therefore greater insulation.

14.6% Greater Heat Retention Than Original Round Bubble

Available in 300 Micron, 400 Micron, 500 Micron and 600 Micron.

Green available in 500 Micron only.

300 Micron - 3 year pro rata warranty

400 Micron - 3 year full replacement warranty with 2 year pro rata

500 Micron - 3 year full replacement warranty with 5 year pro rata

600 Micron - 3 year full replacement warranty with 7 year pro rata

Heatseeker Diamond Space Age Bubble

The Space Age (silver/aluminum heat shield) still allows the collection of heat from the sun's rays and reflects otherwise lost heat back into the pool.

23% Greater Heat Retention Than Original Round Bubble

Available in 500 Micron & 600 Micron.

500 Micron - 3 year full replacement warranty with 5 year pro rata

600 Micron - 3 year full replacement warranty with 7 year pro rata

SS2H Stainless Steel Roller

Supreme Heating's SS2H Roller is made from a stainless steel frame with a wheel and handle to ensure your blanket is easy to wind on/off and to easily maneuver and store away from the pool area if necessary. Each roller is provided with a protective sun cover and strap assembly to fix to the blanket.

10 year pro rata warranty

Also available:

- Heavy duty roller suitable for larger sized pools.
- Low profile roller which is ideal for applications where height is restricted i.e. where roller is placed in an enclosed area/box.

Micron or UM = Wall thickness of blanket material.

* Save water and money

To promote water conservation, some state and local governments offer a rebate of up to \$200 on the purchase of pool blankets. Please contact Supreme Heating or your local distributor to find out whether you are eligible for a rebate.
